

# 1 Introduction

## 1.1 Intro

Hola Amigos, I am **Nasir Hussain** and I am an Aspiring and Inspiring Life long learner, & a Developer helping to solve the Problems faced by the generation by using the L latest Cutting Edge Technologies. I Hope you would love reading the Further Paragraphs.

## 1.2 Story

7 Years From Now, I've started my journey at the age of 7 with some basic computer knowledge and then got into an Institute to learn more about Software Development, It lead me to some basics of Designing (Photoshop and Flash) & A little bit of Development on **VB 6.0**, It was really easy to learn and then I moved on to another well recognized Institute to pursue a Diploma, Me & My family faced alot of issues regarding my Age, but at the end Everything went on very well and After 2 Semesters there, I got involved into local Development Communities and was honestly Shocked to know that what I've previously learnt keeps evolving and is rapidly changing and then I landed into a BlockChain Organization as a **BlockChain Developer** and **BlockChain Teacher**, *It was one of the best Professional Learning Experiences* and after I left, I got more involved into Personal Growth and it led me to alot of amazing goals and achievements & Now I'm in Google Code In writing this ;).

## 1.3 Work Experience

Organization	Designation	Tenure
<b>TeensWhoCode</b>	Founder	Dec 2019 - Serving
<b>Mentors Without Borders</b>	Mentor	Nov 2019 - Serving
Trustworks	Community Lead	Apr 2018 - May 2019
SecureNodes	Founder	Apr 2018 - Feb 2019

## 1.4 Excited & Learning

- Machine Learning & Data Science
  - Social Innovation
-

## 2 LaTeX Experience

### 2.1 It's the First, Amazing & Playful

Well Honestly speaking, It's my first time working on LaTeX and being playful. I just got to know about it in a previous task on *Manim* to write a basic equation, I didn't know this much could be done on it. In the previous task i just copy pasted most of it from Internet. Now it's Amazing to Write on TeX Maker.

I Feel Like I can Write a Book on It ;)

Thank You Niharika Shrivastava & A.Baloochi for such Amazing, Playful & Insightful Task, Looking forward for more. =) )

## 3 Thank You & Contact
